

# DUNCAN MACKINTOSH

MAINTENANCE ENGINEER / CARETAKER

## ◎ SUMMARY

- I have spend 10 years as a maintenance engineer/ Caretaker at Wimbledon offices dealing with many roles involving doing plant checks around the building. Health and safety checks around the buildings As well as dealing with contractors and employees from our offices in our three buildings and dealing with there requests of fixing things or dealing with with people in our flats as well. So it's a very different role and have to be flexible with dealing different situations on a daily basis as each day is never the same. But for myself now I am in need of a change of environment and looking for more of a rewarding job and making new friends and work colleagues in a role that I feel proud of being part of a team and enjoying my day at work is key so end of the day I feel I've done a good job and had enjoyed doing it be it on my own or with people.

## 📁 EMPLOYMENT HISTORY
