Work Experience

Network Engineer

Openreach - Gloucester
May 2019 to Present

I currently work at openreach and have done for just over 3 years, I've been working on maintaining and installing copper and fibre internet lines and building infrastructure on behalf of over 600 service providers. I really enjoy my job and there are so many benefits to keep me aswell as a great pension scheme. However when I first joined openreach it was a company driven by huge boundaries which made the company and the employees within, a family. At this recent time I see a lot of change happening in the company which doesn't sit well with me personally. I always had in my mind to purchase my own plumbing kit and work for myself on weekends but having a child has made that change very slim. I am now looking at other options as a possibility for my families future. Openreach is still a great company with great employees, I just find myself sat in limbo at these times with striking etc so am deciding to explore options

Network Engineer

Kelly Communications - Gloucester
March 2018 to Present

I worked at kelly group for a year and a half before moving direct with Bt.. Really enjoy the job and it's very practical, I am self employed, plan and route my jobs as I receive them the night before on a work phone. I am completely soul working throughout out my days so my customer skills are very respectful and I'm very mindful of the customers. I have had in house training to fulfil this position.

Apprentice Plumber

Glevum building - Gloucester
June 2016 to Present

I worked at Glevum building for just over 3 years in total. I was able to study level 1 construction at college aswell as my level 2 in plumbing. I then progressed onto my level 2 NVQ in plumbing and heating, 1day a week at College for 2 years with onsite experience for the remaining 4days a week. I have nvq certificates to prove. I have just over 3 years experience of everyday plumbing and know the ins and outs of basic plumbing and heating.

Education

NVQ

Level 2 nvq college
